- Goal 4.** All students will be educated in learning environments that are safe, drug-free, and conducive to learning.
- Goal 5.** All students will graduate from high school.

Comprehensive Needs Assessment

Demographics

Demographics Strengths

As a small, rural school, the student enrollment has grown over the past few years indicating that the community is pleased with the education of our students. The enrollment of transfer students has remained stable, and in reference to our elementary classes, the district has had to turn away transfers because the enrollment in the classes are at the maximum.

The teacher to student ratio of 1:12 allows the teacher to become familiar with the specific learning needs of the students in the classroom. Also, it allows the teacher to have more access to one-on-one instruction, when needed.

Demographics Summary

SCHOOL PROFILE (SW1) The campus enrollment/demographic data reflects 286 students as per the TAPR: 44.5% Hispanic, 54.2% White, 1.4% Two or More Races. The enrollment has fluctuated slightly over the past few years according to state reports: (11-12: 252, 12-13: 255; 13-14: 240; 14-15: 255). The demographic percentages have stayed almost the same every year. 59.79% of the student body is Economically Disadvantaged and 25.17% are considered at-risk. There are no migrant students, and the average of the campus mobility rates is 32.9%. We have 21 ESL students in the district. Usually ESL students are exited out of the program after 2 years and monitored closely, but the students moving into the district over the past few years have been older students who have more difficulty grasping the language than younger students, but specialized instruction are helping these students with the transition. Our CTE program includes about 32.17% of our population and is very successful in the agricultural aspects and the career and tech aspects. Our gifted and talented consist of 0.7% of the population and is served through advanced courses. Miller Grove ISD professional staff is 68.7% white females, 20.8% white males, 0.9% hispanic male, and 9.5% hispanic female with bachelor degrees and 5 with masters degrees and 1-28 years of experience. The average teacher/student ratio is 1/11.

Student Achievement

Student Achievement Summary

STATE ASSESSMENT: Reading 71%, Math 71%, Writing 71%, Science 64%, and Social Studies was 78%.

Comprehensive Needs Assessment

Student Achievement Summary (Continued)

STATE ACCOUNTABILITY: The campus has a rating of Met Standard with a Distinction Designation in Postsecondary Readiness.

FEDERAL ACCOUNTABILITY: The campus has met federal compliance standards for NCLB.

Student achievement data comes from reports in Academic Performance Report, PEIMS, and State Accountability. We disaggregate our data (with the help of DMAC) by passing rates in subject and grade. The achievement gap between our whites and ELL students is decreasing. Our science passing rates have increased, especially at the high school level. Our biggest areas of concern are in reading and math, particularly in our Hispanic and economically disadvantaged groups. Intervention programs are in place, but it is an ongoing process to eliminate these achievement gaps. The district has a 100% graduation rate.

School Culture and Climate

School Culture and Climate Summary

The overall consensus of the community, parents, students, and staff is that our district is a safe place to be. Ongoing communication and planned meetings are held to address any safety needs on campus, such as fencing, security cameras, and visitor access. In the past several years, there have been only two DAEP placements. Attendance is a 96.86%. Our staff works closely with all of our students because we are a small, rural school and work to provide donations of food, funds, clothing, and school supplies when needed. Yearly training for the staff includes: anti-bullying, behavior and classroom management workshops, and Alice Active Shooter training. Every year the district participates in the Red Ribbon Campaign to help student awareness on drugs and bullying. 87% of our 3-12 grade students are involved in extracurricular activities, a reflection of their satisfaction of the school

School Culture and Climate Summary (Continued)

culture and climate. Our school is the center of the community and is utilized for many activities in the community. The vision, mission, and goal statements of the district all point toward high expectations for everyone, and our students and staff are aligned to this concept.

Staff Quality, Recruitment and Retention

Staff Quality, Recruitment and Retention Summary

All teachers and paraprofessionals are highly qualified. Evaluation data indicates that teachers are proficient to outstanding. We have 5 teachers with master degrees and 5 of these teachers are teaching dual-credit college-level courses. Our retention rate for teachers is 80.7%. When hiring new teachers to our staff, we use the online regional database of highly-qualified candidates, the school website postings, and local college teacher programs. The district also pays \$1000 above base for all teachers. New teachers are assigned mentors and are enrolled in new teacher training at the regional service center. Each year the district assigns math and science teachers to the Regional Service Center Cohort, when they are conducted. Also implemented is the opportunity for teachers to visit other school district campuses to observe exceptional teaching practices. Time and resources are provided for interventions and training. Professional development includes face-to-face mentor training, administration face-to-face training and conferences, online training, and regional staff development. Staff development is monitored thru walk-throughs and observations, data analysis, and use of resources. If a teacher performance is not up to expectations, intervention plans are implemented.

Curriculum, Instruction and Assessment

Curriculum, Instruction and Assessment Summary

Our district curriculum is the TEKS set forth by the state. The TEKS Resource System contains an Instructional Focus Document and Year at a Glance that is utilized in planning. Vertical Alignment is reviewed each year. Vertical and grade level meetings locally are used to monitor the curriculum by the teams of subject area teachers. Results of state assessments are disaggregated and analyzed to as to develop instruction. Three benchmark assessments are given in grades PreK-2, beginning, middle, and end-of-year, to monitor performance. Two benchmark assessments are given in grades 3-10 to provide predictors to state testing performance. Student performance data is reviewed each year and critical areas of weakness are determined. Accelerate instruction is designed around data-driven identified student needs. State testing results and local benchmark scores show the need for additional instructional time and more one-on-one intervention. At-risk and ELL students are the highest need group for this type of intervention.

Comprehensive Needs Assessment

Curriculum, Instruction and Assessment Summary (Continued)

Additional periods for math are scheduled in the junior high to help with low performance. Morning and afternoon one-on-one tutoring is also available to help students in need.

Family and Community Involvement

Family and Community Involvement Summary

Parent and community involvement is good. The parent turnout to extra-curricular activities and school meetings is good with the exception of the parents of the at-risk students. Teachers communicate with parents through phone calls, e-mails, and school web pages and Facebook. The online grade book allows for easy monitoring by parents and students of schoolwork. Parents and community members serve on decision-making committees that drive changes needed on campus. The Meet the Teacher Night in the fall is attended by a large number of parents, as is the Open House in the Spring. The National Honor Society plans and hosts a Veterans Day breakfast and program that is well-attended by local veterans and family members. The tradition of a Fall Carnival and End-of-Year Stew/Field Day is a community event that has been around for years. The PTO supports families at Thanksgiving and Christmas with food baskets, and the NHS contributes with a canned food drive. The NHS was responsible for a community-wide clothing drive that benefited many families. Local businesses provide donations for district activities and student scholarships. The Student Council sponsors several activities, such as: Father/Daughter Dance Teacher Appreciation Week, and the Veterans Day Event. The CTE organizations have great support from the parents and our students do well in their competitions. CTE, Academic, and Sports banquets/programs are held each year to recognize the accomplishment of our students and the teachers/coaches/sponsors that make all of the participation possible. Our school is in a partnership with STARRY counseling services which provide free counseling to students and families at school or in their office.

School Context and Organization

School Context and Organization Summary

Central office staff accommodates the financial needs of the campuses as funds are available. Instructional supports, such as staffing, classroom facilities, materials, and technology are in place. Schedules are designed around student need and include small class sizes. Teachers serve on decision-making committees, and the administration has an open door policy concerning ideas and opinions. Our number of transfers from other districts speaks of the confidence in our school. The campus exhibits a climate of high expectations for all students and fosters the idea that all students can learn.

Technology

Technology Summary

Comprehensive Needs Assessment

The district technology resources include at least one computer/laptop in every classroom, printers, high school computer lab, elementary computer lab, iPads for every teacher and some for classroom use, kindle fires for classroom use, ceiling-mounted projectors, document cameras, mimio interactive whiteboards, automated parent notification system, wireless access, and one mobile lab of chromebooks. According to the Texas StarChart, the teachers and students of our district are at the next to the highest level of proficiency in most categories. Teachers continue to receive ongoing training in new technology programs available for use in the classroom and training to effectively integrate technology into their instruction. The teachers use DMAC for disaggregating achievement results throughout the year which help them to determine instructional needs at any time. DMAC is also used by the administration for PDAS, State Assessment, and Campus Planning. Teachers use TAG and TEKscore for creating local assessments aligned with the TEKS. The addition of a Technology Coordinator to the staff allows on-campus support for the entire staff and allows for the technology to be up-to-date in maintenance requirements.
